Tips for Making Photo Books

: 0 |

There are lots of sites that offer you to make your own photo books with various layouts, pricing options and sizes. Of course there is a wide difference in quality of photo book made from an expert than with some book made from an amateur, but still, you can create your own photo book for your needs only in a few days with good layouts and templates provided by the various websites. This means that you don't need to make too much investment in creating your photo book.

Here are few tips that are very useful for making your own photo book

First of all you need to create new folder for files (photos) on your laptop or computer. This folder is intended for all images that you will use for your photo book. Choose all images that you want to use for your photo book. Delete all images that are not clear or you don't like. Also, make sure that you don't copy same images from your camera into your new folder. It is not must, but still, it is recommendation that you rename all your photos into the new folder with the names that you prefer. Usual names for files, especially for images are:

01image.jpg,
02image.jpg, etc.

But, also you can add titles to each of your images, including number for each. This way of renaming is good as you can recall all your images distinctly. Also, it is necessary that you add short descriptions for all your photos. Make sure that each description belongs to proper image. Compare more self-publishing websites and choose the one that gives you the best prices and best options for photo book.

Open an account on the chosen photo creation site. If it is necessary download the site's free book software.

Follow all instructions that are provided through the wizard for installation. Make sure that you agree with all conditions and the terms before you start with downloading. If there is no need to downloading and installing this software, then create your photo book directly on the site.

The good thing with these sites, which offer making of photo book, is that they also instruct you how to customize your photo book. There are few steps that you need to pass for creating photo book. Firstly, you need to choose the size of your book. Second, choose your book style. There are more styles that are offered to you, through the dropdown menu, so make sure that you have chosen style that most match to your book pattern. Next step is importing of your images into the interface of the program's photo book. At the end you need to create your book cover, back cover and spine. Also, if you have an option to create inner book flaps and text, you should to add it to your photo book.

Having a photo book means having and keeping your memories. These books are new way to preserve and cherish your memories, different from traditional way. With creating your own photo book, you will keep your favorite memories closer to you.
